Technical Report on critical concentrations for DST of medicines used in the treatment of DR-TB

World TB Day 2018: message from our CEO

Today it is World TB Day. And something feels different this year. When I was working as a young TB doctor in Tanzania more than a decade ago, I never imagined that in 2018 there would be such momentum towards ending a disease that is now killing more people than HIV/AIDS.

Galvanized by the success of the WHO Global Ministerial Conference in Russia last year, the TB community’s voices are raised like never before, calling on leadership to step up and take the actions that are needed to end the TB epidemic. Sights are set on the first-ever UN High-Level Meeting on Ending TB, when Heads of State will convene in New York later this year to accelerate efforts. Global elimination targets are fixed for 2030. A little over a week ago, at the Delhi End TB Summit, Indian Prime Minister Narendra Modi threw down the gauntlet and declared that India could be free of TB a full 5 years before that.

For World TB Day this year, we have just announced updates to work that we are doing with our partners in paediatric TB diagnostics, and on two projects contributing to the fight against drug resistance.... [Read more](#)

From our partners on World TB Day

Johns Hopkins & U. of Cape Town TB Management Survey:

Clinical practitioners and implementers are invited to give their input to inform international guidelines or recommendations for supportive care in TB meningitis. [Link to Survey](#)
