## World Malaria Day 2018: message from our CEO

Our malaria & fever programme has just received a significant boost in the form of a 5-year grant from Australia’s landmark Health Security Initiative, to accelerate the development and adoption of better diagnostic tools and testing protocols for malaria, and also TB. In malaria, the grant will support the development of diagnostics for low-density and subclinical infections, as well as critical clinical studies that will provide data to support the accelerated registration of new products for *P. vivax* detection and elimination. These will be complemented by policy and implementation initiatives to ensure access and uptake... [Read more](#)

## Spotlight on our work in malaria and pregnancy

Pregnancy is a special time. And a special opportunity for malaria parasites. [Read why, and what we are doing about it.](#)

## From our partners on World Malaria Day

**FT Health: Combating Malaria Special Report:** Includes articles by Andrew Jack (FIND Board) and features interviews with FIND’s [Sabine Dittrich](#) and [Xavier Ding](#).

**Swiss Malaria Group** celebrates [10th World Malaria Day](#) in Geneva.

**WHO:** [World Malaria Day message](#)

## Scientific articles by FIND staff & SAC

For our latest articles on malaria & fever, click [here](#).

## Dx pipeline tracker

Our [interactive diagnostics pipeline](#) maps the status and estimated release dates of different diagnostic tests for malaria, fever, TB and now our neglected tropical disease portfolio.

To update information on the pipeline tracker, or to add a new product, click [here](#).

## Jobs at FIND

[Project Manager - HCV Programme, Yangon, Myanmar](#): application deadline 11 May 2018
