Accelerating access to quality TB diagnosis for pediatric cases

We seek your help & support

- Refer the specimen of the sick child to the project site
- Take advantage of the free specimen transportation facility
- Obtain results through SMS/E-mail within 24 hours

Provide relief and change their lives
When ‘I’ is replaced by ‘We’…
Illness becomes Wellness!

- Diagnosis of TUBERCULOSIS in children is challenging, with most TB cases being treated based on clinical symptoms.
- We addressed this challenge by introducing Xpert MTB/RIF testing across Nine cities in India.
- Xpert has demonstrated excellent performance in detecting TB and Rif-resistant TB.
- Results are available within 24 hours, at no cost for the patient and provider.
- Any doctor can refer the specimen from pediatric TB suspects and provide them this benefit.
