

SANTD Symposium 2023 – April 26

Novartis Campus Basel

Mobilizing Resources against Neglected Tropical Diseases

[CLICK HERE TO REGISTER](#)

An exchange between stakeholders in the Swiss global health sector including research, pharma, academia, and NGOs.

Rationale

Neglected Tropical Diseases (NTDs) affect 1.5 billion people worldwide. Populations living in poverty, without adequate sanitation and in close contact with infectious vectors, and women and girls are disproportionately at risk and affected.

The right to health is not a luxury — it is a human right. Yet, a third of the people affected by NTDs lack access to treatment, because the medicines that exist do not reach them, or because there is simply no effective medicine for the particular disease.

The Kigali Summit (June 2022) represented an important moment in the fight against NTDs and Malaria. Against the backdrop of disruptions of essential services and supply chains during the Covid-19 pandemic and plateauing of funding, rapidly increasing population, and widespread biological challenges such as insecticide and drug resistance, the progress to eliminate these diseases has stalled and even reversed in some countries.

During the symposium we want to discuss resource mobilization, integrated approaches, the importance of continued innovation and ensuring access to new tools and interventions, efficient and data driven use of existing resources, and the need for sustained financing.

Program

14:00 Welcome Coffee

Networking, setup presentations, speakers etc.

Part 1

14:15 Keynote: Summary and Outlook after the Kigali Summit

WHO Global NTD Programme, Vision towards 2030

- + **Ibrahima Socé Fall**, Director, WHO Global NTD Programme

14:30 Fostering Inclusive and Sustainable Solutions on the Ground: Health System Strengthening, Product Development Partnerships

Investments and commitments of Swiss stakeholders – best practices

Short film about the distribution of azithromycin against Yaws (Fairmed)

- + **Helen Prytherch**, Head of Unit at the Swiss Centre for International Health (Swiss TPH)
- + **Joelle Tanguy**, Director of External Affairs (DNDi)
- + **Gesa Pellier**, Head Global Health Programs (Novartis)
- + **Eustache Ndokabila Dunia**, Swiss Agency for Development and Cooperation Program Office Bukavu, DRC (SDC)

15:00 Q&A / discussion

Part 2

15:20 Multilateral Cooperation – Panel Opening

NTDs and malaria in the context of the upcoming Swiss international cooperation strategy

- + **Erika Placella**, Head Global Program Health, Swiss Agency for Development and Cooperation (SDC)

15:30 Panel Discussion

- + **Ibrahima Socé Fall**, Director, WHO Global NTD Programme
- + **Erika Placella**, Head Global Program Health, Swiss Agency for Development and Cooperation (SDC)
- + **Jutta Reinhard-Rupp**, Global Health Institute (Merck)
- + **Gabriel Alcoba**, Head of clinic at the Department of Tropical and Humanitarian Medicine at University Hospitals Geneva (HUG)
- + **Sergio Carmona**, Chief Medical Officer (FIND)

Moderation

- + **Martin Leschhorn**, President Medicus Mundi International / Director Medicus Mundi Schweiz

Panel topics / questions: funding mechanisms / stream and how to integrate NTDs, malaria, developing a sustainable funding model to complement donations by pharmaceutical companies etc...

16:00 Outlook

- + **Lutz Hegemann**, President, Global Health & Sustainability (Novartis)

Wrap up and invitation to Networking Apéro

Closing: René Staeheli, Chair Swiss Alliance against NTDs

16:10 Networking Apéro

17:30 End
